TRAC Oil & Gas are pleased to announce some new appointments.

Bill Brown joins the company as Global Technical Manager.

A Chartered Engineer with PCN & CSWIP Level 3 certification, Bill has over forty years' experience in the Inspection & Non Destructive Testing industry. Bill joins TRAC Oil & Gas' Senior Management Team to contribute to the current high standards of inspection and testing service provision.

Bill Brown
CEng, BSc (Hons) NDT, MInstNDT, FIAQP

Mark McKenzie

Mark McKenzie, joins TRAC's Australian operations in the role of Senior Project Manager. Mark comes from TRAC's Aberdeen office where he worked as a Project Manager. Mark brings with him a wealth of knowledge and comes with previous project experience in Australia. We look forward to working alongside him.

We wish Bill and Mark the best of luck in their respective new roles.

TRAC bolster inspection credentials

TRAC have taken the next step in their expansion plans by bolstering their inspection credentials with the purchase of the Silverwing RMS2 rapid motion scanners.

The RMS2 is a high speed, high accuracy remote access ultrasonic corrosion mapping system designed to evaluate the condition of ferrous structures such as storage tanks, pipelines, pressure vessels and other critical equipment. It can give 100% coverage in a band up to 1000mm wide, significantly increasing probability of detection (POD) of corrosion.

It enables engineers to determine the optimum repair strategy and improve risk life assessment (RLA) & risk based inspection (RBI) maintenance programs. It is also extremely flexible with a range of scanning heads to suit different inspection requirements.

TRAC Operations Manager Stephen Brett said 'the acquisition of the RMS2 enables TRAC to further meet clients needs in an ever demanding market.'

“It is also extremely flexible with a range of scanning heads to suit different inspection requirements”

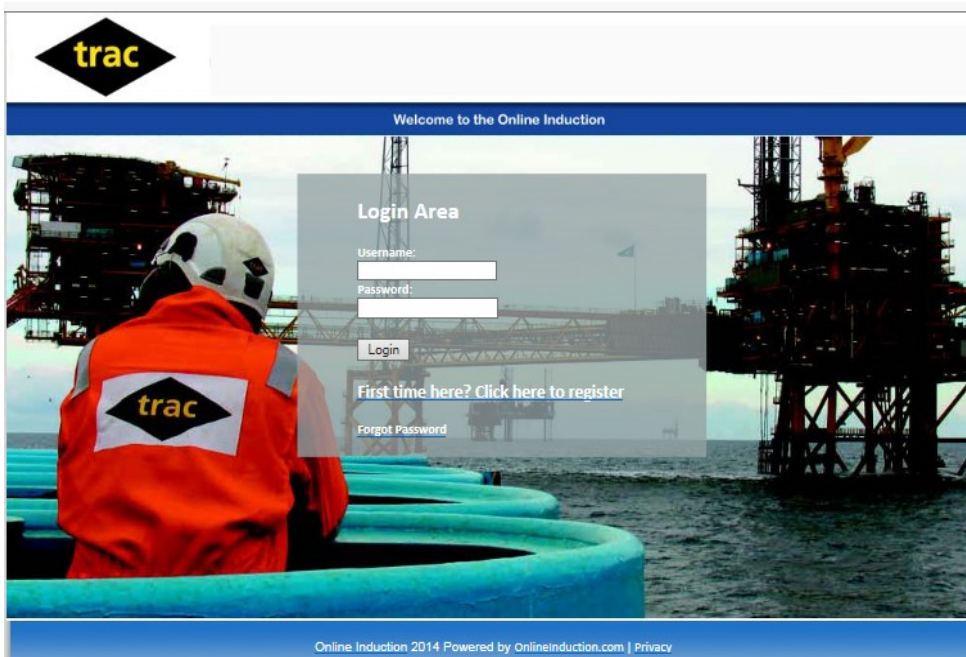

Online Induction

As of Quarter 3 TRAC Oil & Gas Pty Ltd will be rolling out an online induction system for field staff, contractors, office staff and visitors. TRAC's new induction system (screenshot below) will be in place to support compliance with Work Health and Safety legislation. The induction system will also be able to record digitally that staff have not just read inductions but also understood the content through an online assessment. It will ensure staff are trained on core values, organisation standards, introductions, policies and procedures before they start as part of their welcome pack.

The introduction of an online induction system will help TRAC maintain their focus on 'getting it right' as well as continuing their 'attention to detail' approach to business. TRAC operate under a combined HSEQ policy and are certified to all the relevant local and international standards required to deliver high quality services to a global market.

Here at TRAC we have an impeccable safety record and stand by our motto of "we work safely, or not at all" whilst aiming for a zero incidents outcome.

"Expediting the onboarding process and improving the tracking capability of core skills & competence"

Safety Award

TRAC are delighted to announce they've recently been awarded the Gold Safety Achievement Award from IFAP along with six months without a lost time injury award.

This has been awarded as a result of TRAC successfully implementing Workers Compensation & Injury Management Return to Work programmes and all employees are now fully trained in fatigue management.

These awards will be collected by Caroline Rodger - HSEQ Coordinator and Mark Mckenzie - Senior Project manager at the IFAP Safety awards ceremony in October.

Caroline said of the award 'this is great news for the company and we are proud of our impeccable safety record— I would like to thank all colleagues for their help and support in achieving this award.'

SEAAOC

TRAC recently exhibited at the SEAAOC (South East Asia Australia Offshore & Onshore Conference) in Darwin.

SEAAOC is Northern Australia's largest and longest established petroleum conference and brings together major players involved within Australasia's Oil & Gas Industries. The event is run as a partnership between informa Australia and the department of the Chief Minister—Northern Territory Government of Australia. The event runs alongside the

'mining the territory conference' as well as 'building the territory conference' combing all 3 events to form NT Resources week.

Charity

For a third year running, TRAC completed the HBF 'Run for a Reason.' Stephen Brett, Ross Mackay, Philippa Bowman and Daniel Lewis all ran the event on May 25th.

This year there was over 30,000 participants which makes the HBF run the most participated charity event in Perth. The event started in the Perth CBD and went via the Mitchell Freeway, before participants reached the finishing line situated by Gloucester Park race course.

The team raised \$500 for their chosen charity, 'Children's Leukaemia and Cancer Research.'

Tough Mudder

September saw TRAC Pty colleagues Stephen Brett & Daniel Lewis enter Tough Mudder. Tough Mudder is a 20 km obstacle course designed to test all-around strength, stamina, teamwork, and mental grit. It is described as 'Probably the Toughest Event on the Planet.'

Only 78% of entrants successfully complete the challenge but Stephen & Dan conquered it with ease, and also managed to raise over \$500 for charity. Well done guys!
